

# Illumination compensation with seismic-while-drilling plus surface seismic imaging

Nasser Kazemi, Roman Shor and Kris Innanen

CREWES Tech Talks  
January 26, 2018

Adapted from Poletto et. al., 2006

- ❑ Displacement, harmonic waves, boundary conditions: source signature.
- ❑ Drill bit source is continuous.

- Geosteering
- Optimized Well placement
- Interactive decision making for drilling
- Reducing the drilling risks
- Reducing uncertainties

# Geosteering and Well placement issues

Injecting water

Producing oil

Scenario A

Injecting water

Producing oil

Scenario B

- ❑ Statoil Hydro Troll field: 2.4 b\$ (Based on OTC-17110)
- ❑ Chevron Alba (John Hampson) 225 M\$ of additional production in 3 wells

Roland Chemali, *Advanced Geosteering for Optimal Exploitation of Hydrocarbon Reserves*, SPE Distinguished Lecturer Program, 2011.

- Geology
- Time to Depth conversion
- Sub-seismic events
- Depth imaging

- Migration operator falls behind the physics
- Inaccurate velocity
- Acquisition footprint
- Seismic Bandwidth
- Nonuniform illumination

## Linearized Born approximation

$$\mathbf{d}(\mathbf{x}_r, \omega) = - \sum_{\mathbf{x}} \mathbf{G}_0(\mathbf{x}_r, \omega; \mathbf{x}) \mathbf{m}(\mathbf{x}) \omega^2 \mathbf{u}_0(\mathbf{x}, \omega) = \mathbf{A} \mathbf{m}$$

$$\mathbf{m}_{mig}(\mathbf{x}) = - \sum_{\mathbf{x}_r} \sum_{\mathbf{x}_s} \sum_{\omega} (\omega^2 \mathbf{u}_0^*(\mathbf{x}, \omega, \mathbf{x}_s) \mathbf{G}_0^*(\mathbf{x}_r, \omega; \mathbf{x}) \mathbf{d}(\mathbf{x}_r, \omega))$$

$$\mathbf{m}_{mig}(\mathbf{x}) = - \sum_{\mathbf{x}_r} \sum_{\mathbf{x}_s} \sum_{\omega} (\mathbf{u}_s(\mathbf{x}, \omega, \mathbf{x}_s) \mathbf{u}_r(\mathbf{x}_r, \omega; \mathbf{x})) = \mathbf{A}^T \mathbf{d}$$

Source side wave field

Receiver side wave field

$$\mathbf{m}_{mig}(\mathbf{x}) = - \sum_{\mathbf{x}_r} \sum_{\mathbf{x}_s} \sum_{\omega} (\omega^2 \mathbf{u}_0^*(\mathbf{x}, \omega, \mathbf{x}_s) \mathbf{G}_0^*(\mathbf{x}_r, \omega; \mathbf{x})) \sum_{\mathbf{x}'} \mathbf{G}_0(\mathbf{x}_r; \mathbf{x}') \mathbf{m}(\mathbf{x}') \mathbf{u}_0(\mathbf{x}')$$

Migration

Inversion (LSM):

Merits:

Balanced amplitudes

Attenuated artifacts

Better resolution

Reduced acquisition footprint

Demerits:

Computational time

Null space of the operator

Kazemi, N., Efficient algorithms for least squares wave equation migration and source signature estimation, PhD thesis, 2017, University of Alberta.

$$\mathbf{d} = \mathbf{A} \mathbf{m}$$

$$\mathbf{m}_{mig} = \mathbf{A}^T \mathbf{A} \mathbf{m} \quad \mathbf{A}^T \mathbf{A} \neq \mathbf{I}$$

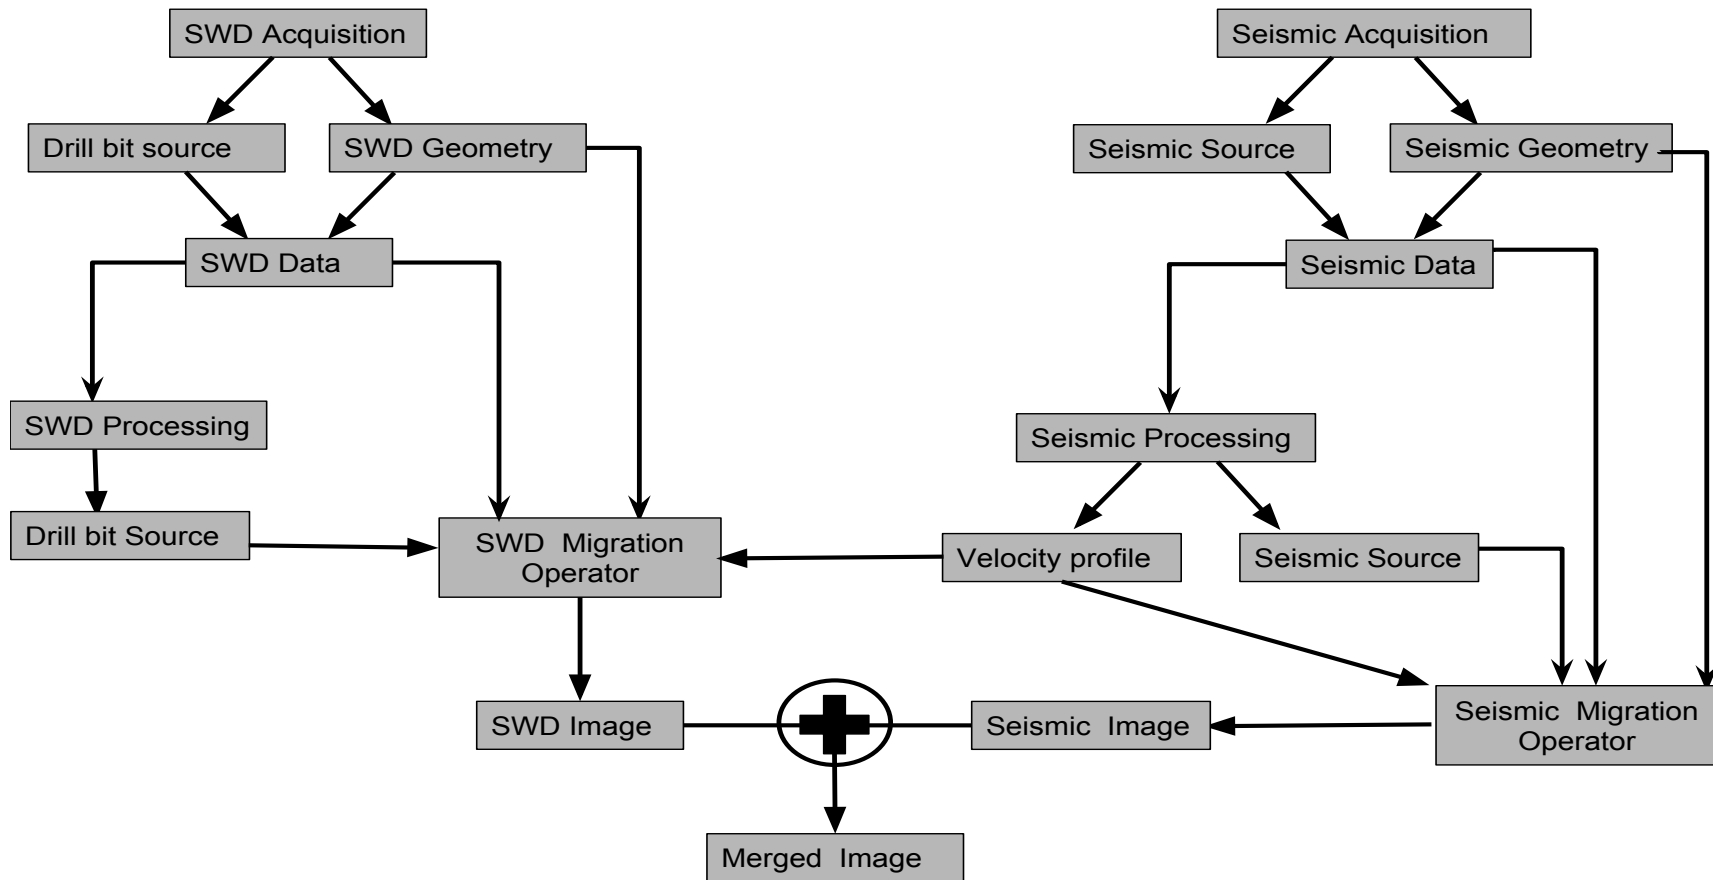

$$\mathbf{m}_{LS} = (\mathbf{A}^T \mathbf{A})^{-1} \mathbf{A}^T \mathbf{A} \mathbf{m}$$

Our proposed method

$$\mathbf{m}_{merged} = \mathbf{A}^T \mathbf{d} + \mathbf{A}_{SWD}^T \mathbf{d}_{SWD}$$

$$\mathbf{m}_{merged} = [\mathbf{A}^T \quad \mathbf{A}_{SWD}^T] [\mathbf{d}; \mathbf{d}_{SWD}]^T = \mathbf{A}_{merged}^T \mathbf{d}_{merged}$$

$$\mathbf{A}_{merged}^T \mathbf{A}_{merged} \approx \mathbf{I}$$

- Solve for the reflectivity: SMBD algorithm

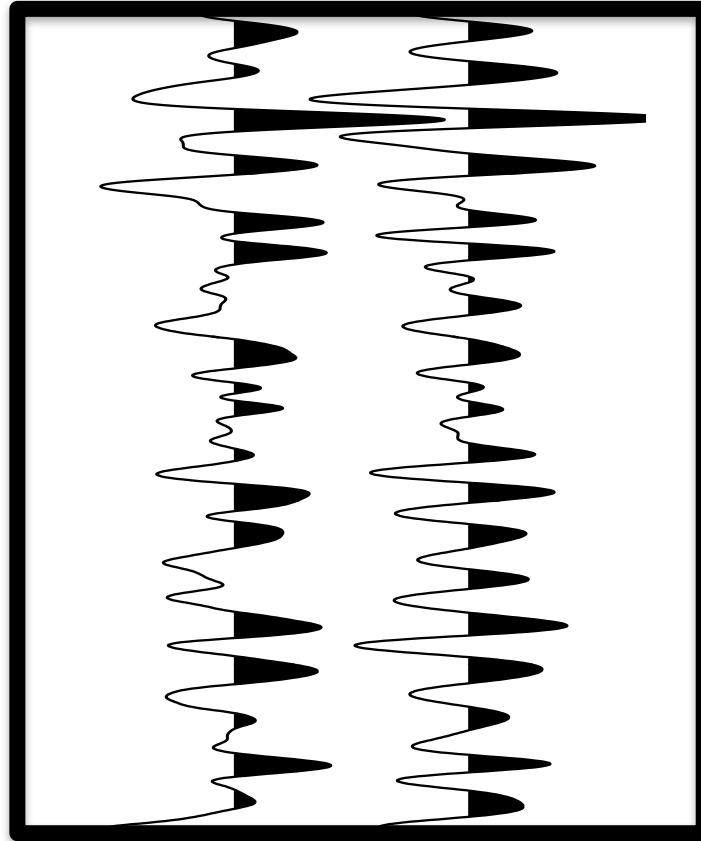

$$\hat{\mathbf{x}} = \underset{\mathbf{x}}{\operatorname{argmin}} \quad \frac{1}{2} \|\mathbf{A} \mathbf{x}\|_2^2 + \lambda \sum_i (\sqrt{x_i^2 + \epsilon^2} - \epsilon), \quad \text{subject to} \quad \mathbf{x}^T \mathbf{x} = 1$$

- Estimate SWD source signature: least squares estimator

$$\hat{\mathbf{w}}_{SWD} = \underset{\mathbf{w}_{SWD}}{\operatorname{argmin}} \quad \frac{1}{2} \|\mathbf{X} \mathbf{w}_{SWD} - \mathbf{d}\|_2^2$$

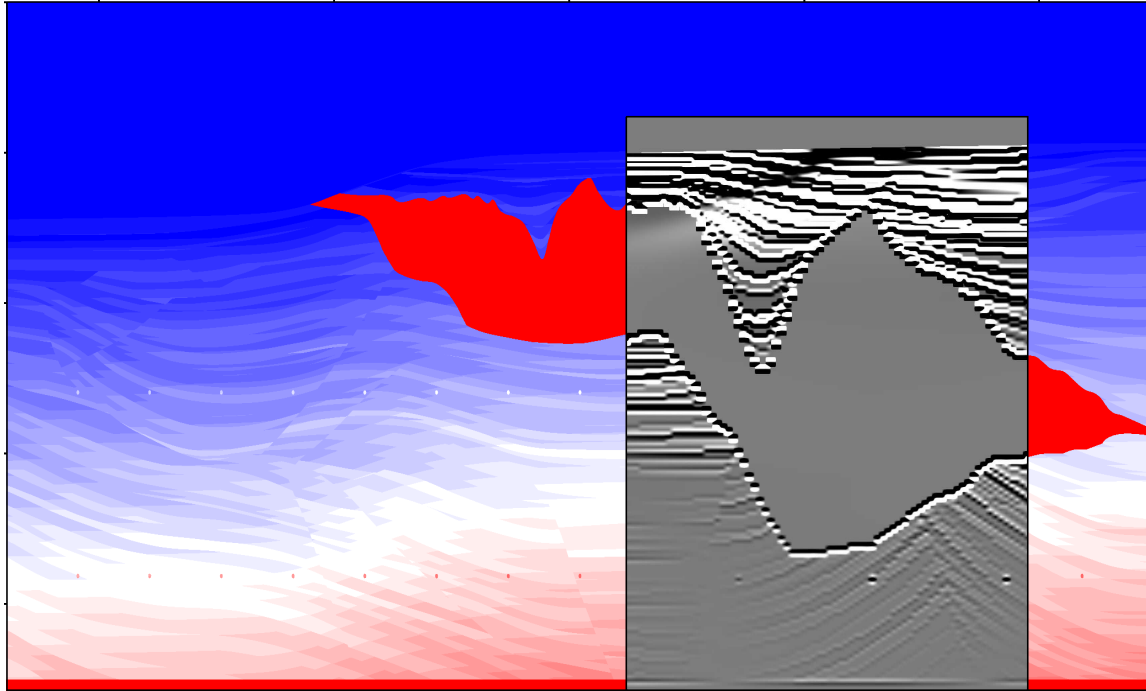

Original Estimated

- ❑ Minimizing drilling uncertainties will result in better production.
- ❑ Uncertainness of depth imaging is discussed.
- ❑ Poor subsurface illumination inherent in seismic imaging is shown to be one of the major sources of uncertainties.
- ❑ Seismic-While-Drilling imaging combined with surface seismic improved subsurface illumination.

- I thank CFREF and nextGen Wells research initiative for supporting this research.
- I thank my teammates in Petroleum engineering department for their suggestions and inspired discussions.
- I thank CREWES for the opportunity to present the results in Tech Talk series.
